

Jared Vandeventer

Full Stack Web Developer

Phone: 720-470-7493 | Email: vanthedev@gmail.com

Work Summary:

Full Stack Web Developer 2018 - Present

Freelance Full Stack Web Developer

- I've been a web developer since the beginning of 2018 and I'm passionate about solving complex problems with code. Prior to that I've owned multiple businesses in the trades industry.
- I have a deep understanding of JavaScript and all of its quirks. As a self-taught developer, I pride myself on seeking out relevant documentation and picking up 3rd party libraries with relative ease. Most of my projects have been built using some variation of a MERN stack. I'm currently building a VMS for gov't entities to post RFP's and for contractors to network, bid on relevant jobs.

Skills:

HTML5 | CSS3 | JavaScript/ES6 |
React + Redux | Express |
MongoDB + Mongoose | Bash Scripting |
